Suraj Kumar

Full Stack AI Developer | React, Node.js & MongoDB | REST APIs | Building AI-Powered Web Apps | Open to Opportunities
South East Delhi, Delhi, India

Summary

Full Stack Developer with production experience at WizCommerce, a B2B e-commerce platform serving 30+ live storefronts. I build with React, Node.js, MongoDB, and REST APIs, and I'm now focused on combining full stack engineering with AI, including an AI-powered expense tracker I'm building. I hold a B.E. in Computer Science Engineering from Chitkara University (CGPA 8.10) and a Google Cloud Data Analytics certification. I'm looking for Full Stack AI Developer roles where I can build scalable systems and ship AI features people rely on.

Experience

Bharat Software Solutions
Junior Web Developer
July 2026 - Present (4 months)
New Delhi, Delhi, India

Server-Side Logic & RESTful APIs: Designed and implemented robust server-side logic and RESTful APIs,
writing clean, maintainable, and efficient code that adheres strictly to Object-Oriented Programming (OOP)
principles and design patterns.
◦ Database Management & Optimization: Designed relational and non-relational database schemas, handled
complex queries, and optimized application performance to ensure high responsiveness across all devices.
◦ Cross-Functional Collaboration: Collaborated closely with designers, product managers, and front-end
engineers on software architecture and API integration; maintained clear, organized repositories using Git for
version control.

WizCommerce
Software Engineer Intern

July 2025 - June 2026 (1 year)
Gurugram, Haryana, India

- Contributing to a multi-tenant B2B e-commerce platform serving 30+ live storefronts.
- Migrated PHP-proxy AJAX handlers to direct browser-to-backend REST API calls using a typed JavaScript client and centralized endpoint registry.
- Helped reduce FPM worker usage and eliminate intermittent 502 errors under load.
- Built reusable atomic UI widgets using Atoms, Widgets, and Layouts architecture.
- Used CSS variables and design tokens to improve cross-page consistency and reduce custom CSS by around 80%.
- Optimized data fetching through concurrent and batched API requests to improve page render performance. - Worked with React, WordPress, REST APIs, Redis sessions, CDN caching, Git reviews, and production debugging workflows.

Bharat internships
Web Developer
September 2023 - November 2023 (3 months)
Remote

Built responsive web pages (HTML/CSS/JS); practiced clean-code refactoring, debugging, and Git workflows in a remote agile environment.

Education

Chitkara University
Bachelor of Engineering - BE, Computer Science · (July 2022 - August 2026)

St Marks Sr Sec Public School
High School Diploma, Science Stream · (March 2021 - March 2022)
