Professional Summary

Full Stack Developer with 1+ years of hands-on professional experience in front-end, back-end, and full-stack web development. Currently working full-time as Junior Web Developer at Bharat Software Solutions focusing on backend development and PHP API integration. Proficient in React.js, Node.js/Express.js, PHP, MongoDB, MySQL, and REST API development. Strong expertise in building scalable web applications, AI integration (OpenAI/Gemini APIs), microservices architecture, and responsive UI design. Demonstrated ability to deliver production-quality code with 85

Education

- **Chitkara University** — Solan, Himachal Pradesh, India
  Bachelor of Engineering in Computer Science and Engineering; GPA: 8.10 — *Sep 2022 – Aug 2026*

Experience

- **Bharat Software Solutions** — Delhi, India
  Junior Web Developer – Backend Development — *July 2026 – Present*
  - **PHP API Development**: Developing robust RESTful APIs using PHP with focus on backend architecture, data validation, and secure API design. Building microservices for web applications with clean code principles and proper documentation.
  - **Backend Development**: Designing and implementing backend services, database optimization, and server-side logic. Working with MySQL and database design patterns to ensure scalability and performance.
  - **Full Stack Integration**: Collaborating with front-end developers to integrate APIs with user-facing applications. Implementing authentication, authorization, and security best practices across full stack.
- **WizCommerce** — Gurugram, Haryana, India
  Software Engineer Intern — *July 2025 - June 2026*
  - **Full Stack Development**: Built scalable React.js frontends with Redux, responsive UI components, and developed RESTful APIs using Node.js/Express.js. Managed MongoDB and MySQL databases supporting 30+ production B2B e-commerce storefronts.
  - **AI Integration & Performance**: Integrated OpenAI/Gemini APIs for intelligent product recommendations and smart search. Achieved 40% reduction in API latency and 35% improvement in user engagement through optimization and prompt engineering.
  - **Code Quality & Testing**: Engineered 25+ reusable React components and implemented Jest/React Testing Library achieving 85%+ code coverage. Led code reviews and maintained Git-based workflows using Agile methodologies.

Projects

- **AI-Powered Expense Tracker**: Full-stack MERN application with AI-driven expense categorization, spending analysis, and smart budgeting. Integrated OpenAI/Gemini APIs with anomaly detection, interactive visualizations (Chart.js), and JWT authentication. Tech: React.js, Node.js, Express.js, MongoDB, Python, Docker

Technical Skills

- **Front-End**: React.js, Next.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Design
- **Back-End**: Node.js, Express.js, PHP, RESTful APIs, Microservices, JWT Authentication, API Security
- **Databases**: MongoDB, MySQL, SQL, Database Design, Query Optimization, ORM Technologies
- **AI/ML Integration**: OpenAI API, Gemini API, Prompt Engineering, LLM Integration, Intelligent Automation
- **Testing & DevOps**: Jest, React Testing Library, TDD, Git, GitHub, Docker, CI/CD, Postman
